December 2023 processing timeframes and statistics

- 19 BCs granted, average of 8.3 days to process/grant (100% < 20 days)
- 28 CCCs issued, average of 7 days (100% < 20 days)

• There were 2 x Certificate of Acceptance (COA) applications approved, and no Schedule 1(2) discretionary exemption applications approved this month.

• The following BC and CCC graphs show the numbers lodged, granted and/or issued for December, compared to previous months.

Building consent applications

The trend towards the end of 2023 appeared to be "wait and see" when it came to lodging new building consent applications – in part due to financial pressures and political uncertainty. A surge of applications in November confirmed a bit of confidence in the building industry however the overall pre-Xmas numbers did not meet the previous post-Covid year.

Compliance matters

Building Warrant of Fitness (BWoF) renewals - 14 annual BWOFs were due in December, 11 of those were received and 3 are now overdue.

BWOF audits - two onsite audits were completed in December.

Completion of works

A late flurry of inspection requests also occurred in December especially for final inspections on historic and new builds. This took a lot of resource to manage towards completion with some being held over until January 2024.

Invariably we find we get asked to inspect construction work either too early (as the particular stage is not substantially completed) or too late - and some parts have been covered up or difficult to access to inspect. In those cases, reliance on tradies photos can be considered if a trustworthy source.

Several commercial builds are almost complete and are operating under a Certificate for Public Use (CPU) if they are fit to occupy but not yet at a stage where the CCC can be issued. Building owners and contractors are made aware of this early in the processing phase especially if the building is to remain open and in use during construction. (For example – St James Theatre)

Building consent statistics for December 2023 are attached.

Building Consent Statistics

Building Consents and Certificates of Acceptance (COA's) issued

4. REPORT FROM THE ROADING TEAM

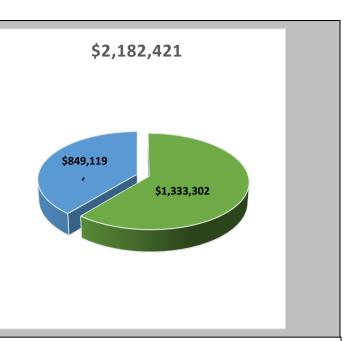

Routine Road Maintenance Contract

(Term 2+2)

This contract is for the routine maintenance of the Gore roading network.

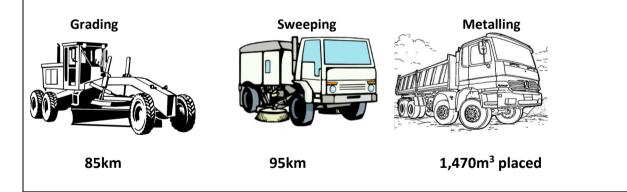

K2 Kontracting

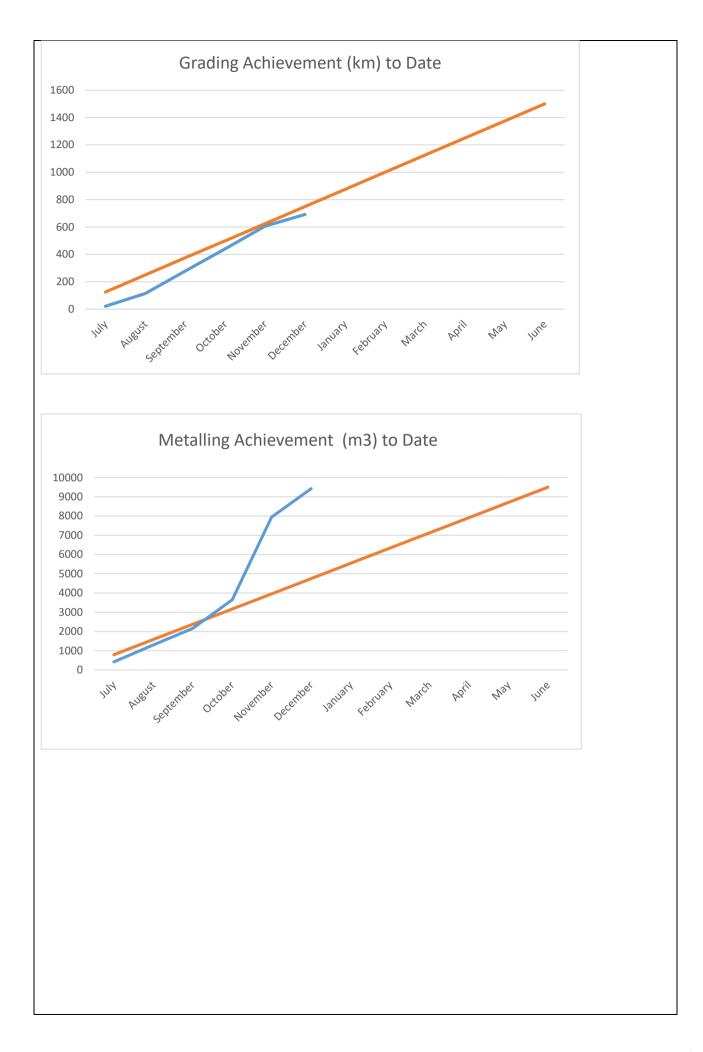

- Routine rural work includes drainage work/culvert replacement, grading, metalling, bridgework, signage.
- Urban work includes hand sweeping, potholes, signage, emergency response, mud tanks grate cleaning, litter pickup and dealing with spills.
- The contract budget for 2023/24 is \$2,182,421.

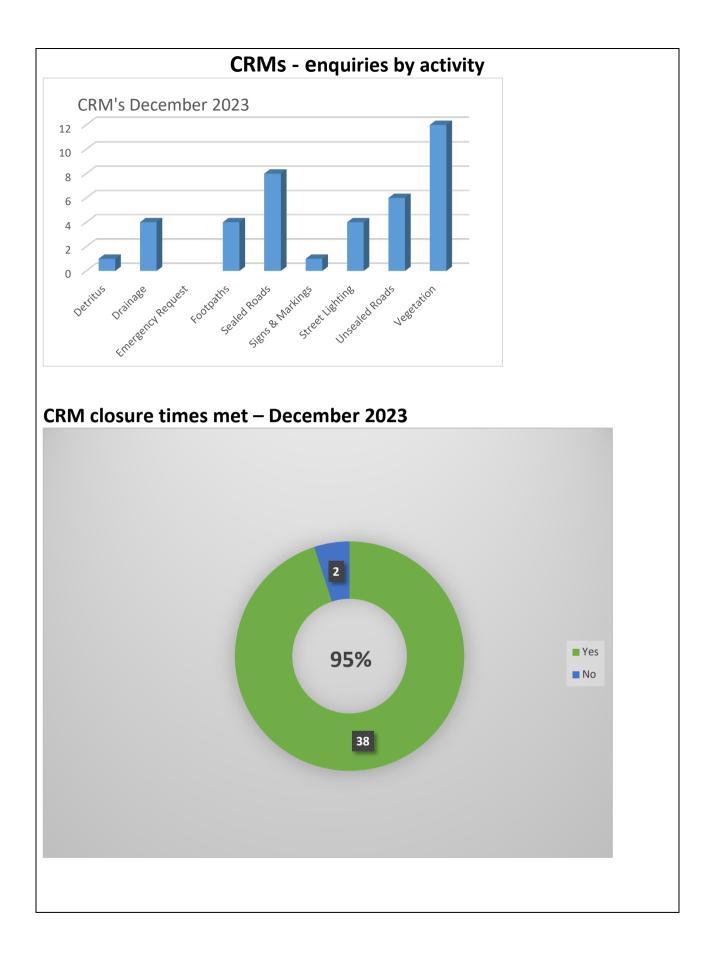

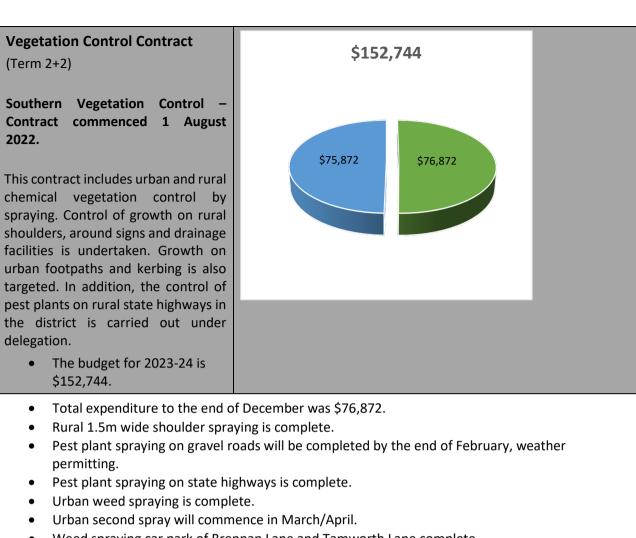

- The total spent to the end of December was \$1,333,302.
- Grading length achieved to date is meeting the target programmed.
- Little use of a second grader was needed during December.
- Metalling quantity achieved to date is well ahead of programme. The current programme is complete apart from Milne and Elder Roads. These roads will be metaled following the completion of current drainage improvement works.
- Favourable grading conditions ensured minimal hand patching of potholes on gravel roads was needed.
- Unlike December 2022 there were no significant weather events requiring response and recovery.
- Callouts to accidents and other incidents continued during and after work hours.

Routine maintenance - December

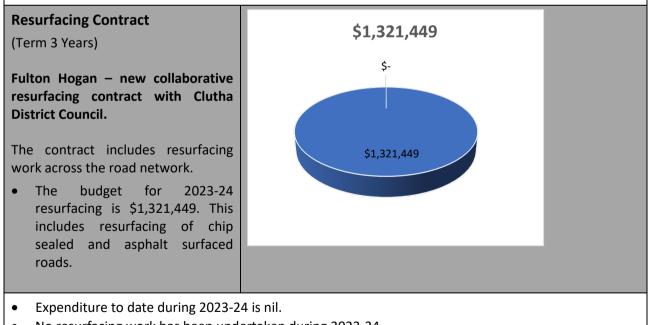

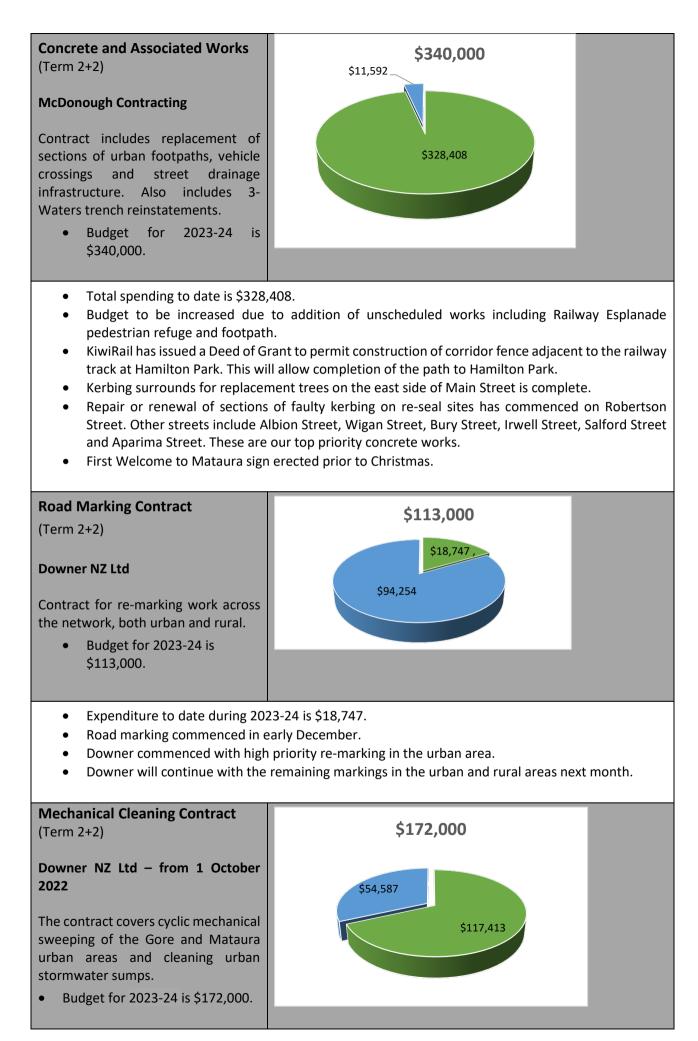

• Weed spraying car park of Brennan Lane and Tamworth Lane complete.

- No resurfacing work has been undertaken during 2023-24.
- Consultant, Beca has formulated the resurfacing programme for 2023-24.
- Fulton Hogan has completed its assessment of all sites.
- Fulton Hogan will submit its proposed treatment options for each site in mid-January.
- Resurfacing will commence in February once site treatments have been approved by the Gore District Council.

- Expenditure to date during 2023-24 is \$117,413. The vacuum sweeper continued its twice weekly visits to Gore and Mataura during December. Some modification of the days on site was undertaken due to the public holidays. Seal Repair Contract \$670,000 (Term 2+2) **Supreme Siteworks** Includes repair of various sealed \$296,530 \$373,470 pavement faults such as edge breaks, digouts, levelling of depressions, and pavement stabilization. Will include pre-reseal repairs from the start of the 2023/24 year. Budget for 2023-24 is \$670,000 •
- Expenditure to date during 2023-24 is \$296,530.
- Supreme Siteworks has completed the initial seal repairs and some reworks from last year spread over the district given by the Council.
- Roading staff are assessing faults on non-reseal sites to be included in a second package of work for the contractor.

Staffing/health and safety

- No injuries or health and safety issues affecting the in-house roading team during December.
- Roading staff engaged in Council wide health and safety activities including the Contractor Link meeting which covered contractor health and safety issues.
- Staff participated in customer risk management training.
- Senior Roading Officer, Hari Pillay, continues with a management training programme.
- The Roading Manager met with Southland representatives of Civil Contractors NZ to discuss shared concerns about the direction, extent and cost of changes to traffic management for road work activities.

Asset management

- Consultant, Beca has completed deterioration modelling for the sealed network. This will guide the reseal and pavement rehabilitation programmes and associated repair programmes over the next decade or more.
- Implementation of recommendations and suggestions contained in the NZTA Technical audit report continue. This report, which has been presented to the Council, will be subject to discussion at the next meeting of the Rural Roading Sub-Committee.
- A night inspection of traffic services infrastructure (signs and edge marker posts) was undertaken over two nights during December. Faults identified during the inspection are currently being rectified.
- A draft programme of proposed Low-Cost Low Risk (LCLR) capex improvement works was submitted to NZTA. The LCLR programme was the subject of a workshop with Councillors in early December. This programme will also be a topic for discussion by the Rural Roading Sub-Committee.
- The final draft Roading Activity Management Plan was submitted to NZTA early on 8 December.

Other network updates

Mataura welcome signs

Both completed sign plinths were transported from Mosgiel to Mataura for installation. One of the plinths was immediately installed at the southern approach to Mataura. A corten steel motif will be attached to the base of the sign when the second sign is installed at the northern approach to Mataura. Installation of the second sign awaits the availability of KiwiRail rail protection staff which KiwiRail requires during installation at the relocated northern site. The Mataura Community Board recently requested that external lighting of the signs be explored. NZTA has subsequently advised that lighting of the signs is not acceptable and will not be approved.

Departure to south

Bridges

Replacement of the damaged section of handrail on the Otamita Bridge, damaged earlier this year by a tractor crash, is underway.

We are currently exploring the capabilities of the local contractor's specialised bridge repair crews by assigning significant repair tasks to each of these contractors and assessing their proposed methodology for the repair along with their execution of the repair. Repairs to bridges on Parker Road (Fulton Hogan), Woodrow Road (SouthRoads) and Ontario Street (Downer) are those chosen for assessment. Testing of these Southland based contractors with specialised resources to undertake bridging works are likely to be part of a panel of pre-qualified from which we will invite to carry out future bridge works.
